The Call Itself

Don't settle for the receptionist that answers the phone. Ask for:

- **The Chief of Staff**
- **The Legislative Director**
- **A Staffer (in charge of environmental or health issues)**

Potential Talk Points

- I'm asking [the senator] to **Vote NO** on **MOBILE NOW** Act S.19 and **DIGIT** Act S.88
- These bills would require small cell tower transmitters every couple of homes emitting high frequencies (24 GHz to 90GHz) that have *never before* been tested for non-thermal biological health effects
- These bills do NOT take into consideration health or safety AT ALL
- These transmitters would be put in the public right of ways
- These transmitters will expose those in the nearby area to harmful RADIOFREQUENCY RADIATION
- We are in NO RUSH to have this infrastructure deployed
- Thousands of peer-reviewed scientific studies have been conducted and they have proven severe biological health implications at levels 3 MILLION times lower than the maximum allowed by the FCC
- Our government is not protecting us
- Today, we are exposed to 100 MILLION times more radiation than our grandparents were
- These frequencies remain UNTESTED for non-thermal biological health effects
- We know these frequencies are dangerous: the radiation emitted by these antennas is actually a Class 2B carcinogen
- Breast cancer, depression, and suicide have ALL been linked to cell towers and antennas
- **Communities already have very little say about wireless facility placement** about Section 704 of the *Telecommunications Act of 1996*, which preempts local authorities from opposing cell tower installation on the basis of health or environmental impacts.
- **These bills would exacerbate this problem**, completely ignoring health and human safety
- **This radiation** will harm our health – specifically our nervous system, heart, brain, etc.
- **This radiation** is confusing birds and killing bees – our pollinators!
- **Congress** amended the *Public Health Service Act* in 1968, REQUIRING that the public “be protected against electronic product emissions”
- **So**, there is simply NO ROOM for these bills to move forward as these bills are a CLEAR VIOLATION of these congressional amendments
- Finally, this infrastructure is NOT NEEDED OR WANTED and it is NOT CRITICAL for emergencies, as wireless facilities are not reliable in emergencies or disasters; only CORDED LANDLINES are

Additional Points

- **Insurance companies know about this:** Lloyds of London excludes liability for damages caused by radiofrequency radiation
- There are safety precautions around drinking, smoking, and drugs; this radiation is no less severe of a health concern; these bills do not take health into consideration AT ALL
- France has recently passed a law that companies are REQUIRED to protect their employees from RF radiation
