

The White House  
1600 Pennsylvania Avenue NW  
Washington, DC 20500

Dear Mr. President:

I, and many hundreds of thousands of Americans, are having health problems due to the increasing amount of background radiofrequency radiation in our country (a.k.a. electrosmog or Wi-Fi). Given that we are exposed to 100 million times more background radiation than our parents were, that should hardly be a surprise.

- Independent research (National Toxicology Program's 20 year Rat Study\*, Dr. Martin Pall's peer-reviewed and award winning work on EMF's and Volted Gated Calcium Channels\*\* or the study published in Environmental Toxicology and Pharmacology on the Effects of acute exposure to WIFI signals (2.45 GHz) on heart variability and blood pressure in Albinos rabbits\*\*\* and more) has shown both short term and long term harmful effects of WiFi. Children are particularly vulnerable.
- Studies that show no harm are focusing on the thermal effects. However, the harm is coming from non-thermal effects.
- Approximately 3% – 5% of people are moderately affected, with another 20-25% of people being slightly affected. Less than 1% of the population is severely affected, but the numbers are rapidly increasing with the exponential rise in EMF pollution\*\*\*\*. Symptoms include, but are not limited to heart arrhythmias, insomnia, headaches, and inability to concentrate. Some studies even link infertility to cell phone use.
- Americans should, first and foremost, be afforded "life, liberty and the pursuit of happiness" Those of us that suffer from the effects of Wi-Fi are slowly being pushed away from those rights and we live in fear that we will no longer be safe in our own homes.

In your first few months in office, please help America become a safer place for all of us. Please:

1. Repeal Section 704 of the Telecommunications Act of 1996. This Section prohibits municipalities from refusing installation of wireless facilities (i.e. cell towers) on the grounds of human or environmental health. Since being enacted, local governments have had very little say and control over their own property.
2. Immediately halt the further intrusion into neighborhoods of cell towers and transmitters. We need to be safe in our homes. (S. 88 and S. 19 Senate Bills)
3. Lower the Federal Communications Commission safety limits: Our current safety standards are a half-century old. Thousands of peer-reviewed scientific studies have proven that there are biological implications in humans, animals, and the environment at levels up to 10,000 lower than those currently allowed by the United States FCC. We propose lowering the limit for radiofrequency radiation emissions from 10,000 mW/m<sup>2</sup> to 1 mW/m<sup>2</sup> or lower – this will be a big step forward in putting health first instead of profits. Many countries around the world have already lowered their safety limits.
4. Ban Wi-Fi (wireless network access) in schools. Millions of children experience symptoms from Wi-Fi allergies on a daily basis. We can have 21st century learning, but we can do it by hardwiring computers with Ethernet cables, which provide faster, safer, more secure, and more reliable network access.
5. Place label warnings on all cell phones, wireless routers and access points, and other Wi-Fi producing instruments stating that they are a possible carcinogen, can cause sterility, etc. These

warnings are in the instruction manuals of these devices, but they should also be displayed prominently on the devices themselves.

Those of us suffering from being exposed to toxic levels of electromagnetic radiation have been forgotten, neglected, abused, and ridiculed for far too long. We have been thrown under the bus by big industry and corporate profits. Electric utilities are disconnecting us for refusing smart-meters, even though they are not required by law. As our new President, please help make America safe again! We know this is a big battle to fight. Corporate greed and industry are no easy opponents. But if we succeed, you will forever be remembered as the President that rebuilt America. You promised us that we would not be forgotten. Please stick to your promise and fight for all of us.

Please make America Great Again,  
EMF Sufferer
